Tuneskit For MacOS High Sierra

Sometimes it's a good idea to do a clean install of a new Mac operating system version.. What's a clean install? That means that the hard drive is erased completely and reformatted, which removes not only the current Mac operating system but all data, files, applications, you name it. Just think of it as a brand new computer having the operating system installed on it for the first time.. In this post, we'll describe how to do a clean install of macOS 10.13 High Sierra
